

## SUBTITLE

Note :

- F = Ferdy
- Z = Zhafran
- E = Ecep
- G = Guest 1, 2, 3

Z : Bismillahirrohmanirohim, Assalamu'alaikum Warahmatullahi Wabarakatuh.

All : Wa'alaikumussalam Warahmatullahi Wabarakatuh.

Z : On this occasion, we will vote related to the design of an application. Previously, who wanted to provide the design? Is Ferdy going to go first?

F : may I.

Z : OK, welcome Ferdy.

F : wait.

E : can you share screen or not? Oh yeah, you're the host.

F : It's you, Cep.

E : am I the host?

F : yes.

E : how do I transfer the host? So that's okay, I'm not the host, sir. You are the host.

F : me?

E : yes.

F : how come I'm the host suddenly.

P1 : just given.

F : wait a minute.

F : already?

E : already.

F : yeah I haven't logged in yet. Not from here, right?

E : yes, it's okay, just start.

F : well, so this is the design. In the application itself, there are extras, but I didn't add it. Like, how do you explain it? So the addition, let's see first. Sort of choosing one of these, but later eliminating the others.

F : done? What else is there to explain?

G1 : You can edit the video later. Just explain each icon.

F : now in this Prayer Journey there is a clock item, The symbol of this clock shows salah on time, from subuh to isya.

G3 : There are two ashar?

F : what?

E : there are two ashar?

G3 : the maghrib, capital right?

F : yes, oh yeah forgot. Sorry to forget.

G3 : was it ashar only?

F : no, I don't want to. This is already from this sananya application.

G1 : says this is still a mock up. Just say it's still not perfect.

F : oh yeah, well, this is how it works if we click on this item, this icon, then the other one will appear missing. So a sign that we are on time, the others are the same. If we click on this one, it means a sign that we are not salah at this time. Then there is also information on the day, there is also information on the date, month, and year. Oh yes, by the way, this mock up is also not perfect, because I also learn to use this application, so it's still a bit difficult to make even better ones.

Z : okay. Do you have anything to ask here?

G1 : can I give you advice or something?

F : really, please.

G1 : can give advice?

F : yes, you can.

G1 : I think this is at subuh, dzuhur, ashr, maghrib, isya, the color is a bit eh, right, is that what the photo will be fix later or what? The problem is that if you use a color like this it doesn't look so good and doesn't convey the message of the time.

F : oh it's not quite right.

G1 : I think so.

F : if this is the case, the color will be changed again if it doesn't convey the message of the time. Like dzuhur is bright, ashar has already started, the sky is a bit reddish in the maghrib, and the night is dark just when isya. Maybe later I will fix it again, I won't fix it.

Z : any more?

G2 : can I talk?

F : OK, really.

Q2 : so, for example, the symbol of the woman praying at home, if you changed the picture of the house, can it?

F : makes sense. Maybe it could also be done at home, because my initial thoughts were specifically for women, maybe the explanation was a bit lacking anyway. This is specifically for women who pray at home, that means.

G1 : the same, maybe for menstruation is like that?

F&Z: well yeah right.

F : currently menstruating, unable to attend, and all kinds of things. Have you done it or not?

P1 : maybe it can be continued to the next design.

F : that's all from me, thanks for your attention. Can continue zap.

Z : oh yeah. Give permission first, share screen.

F : yeah, sorry to forget. How come it was so dark earlier?

G3 : why is it dark?

Z : okay thanks. Next maybe I will convey a little of my design results. Have you seen it yet?

Z : maybe if I have more goals, right earlier if Ferdy might give color markings, what direction do I go to variants the colors. Yes, that's why I use Red.

Z : so what happens here is a taskbar, right? Then I changed it to a record, I made a diary for those who recorded it like Ferdy, then it is the same time for salah. Then after that there is a Qibla direction and this is a help. The goal is so that everything is one touch, so one touch can open everything. For example, if for example what we click, the Qibla direction, maybe it will be this way, initially like this.

Z : after that if it is turned on like this. Then the next, if we were all ferdy, if I had the default icon passed, meaning that he skipped his prayer, since we chose this there would be 4 choices, praying in the mosque, it has been done, unable to make women, the same passed or yes, leaving prayer the. If you choose a mosque, the result is like this. If it's done the result is like this. Likewise next. If for example we click the help sign, the result is like this. This will be explained about this app, so it will explain who the developer is, who compiled it, I think. Then the same tutorial for those who don't understand. So what else, if we choose the time, maybe the same time will be displayed in every yoga menu, there is a date with the same place, where is the place. So then the same, if for example we choose these 3, there are these. This is like a letter for motivation, like the Qur'an for motivation for prayer. So then there are records. These records seem to be real, the results of our collection of records, our diaries. For example, how many percent have we been present for 2 days? Now that means the default is like this, 100% of all. Just like that. Anyone want to add, what do you think?

G1 : how about that. This is actually an icon and all sorts of things are really good to be honest, there are only people who say that this color unites the colors, is too red, so if possible, add a little color variation so it's not really red.

Z : okay. Don't be too red. Anything else?

G2 : permission to argue.

Z : may.

G2 : if I think that's what it's called, the buttons that fit on the mosque bla3 are better off, just show everything, like Ferdy's design earlier. The problem is that sometimes there are people who don't want to do a tutorial, they just try the application right away.

Z ; yes, you can. Can you accommodate the advice first. What else?

P1 : I think so.

Z : okay, okay. Looks like that's my design. More or less sorry.

E : okay, so we're already at the event liaison. Maybe that's all and thanks to my friends who took the time to vote on the design results from Kel. We. Then, oh yeah, maybe we would vote beforehand. Maybe you can start from m.faris.

G3 : wait a moment to hear adzan.

F : yes hearing adzan first.

E : we'll wait for the adzan over.

E : maybe the voting could be continued. Where's M.Faris?

G3 : I prefer the second one, OK, Zhafran's. The problem is that it is so different.

E : maybe it can be explained in terms of its function or how, maybe it's easier to understand or how.

G3 : there's nothing more.

E : okay then from Ikhsan.

G2 : I choose 2 Because of the second design, there are not too many colors, so it's okay, there are more features as well as help, there are others.

E : okay, lastly from Dio. How?

G3 : I don't choose.

E : what do you mean?

G1 : kidding.

F : I'm surprised.

G1 : I chose two because the design is modern. That's all.

F : oh my, lost to me.

G1 : I'm just sorry Fer.

E : So actually maybe yes if my friends don't know. So Zhafran contains one application, if Ferdy only has one part, right or not?

F : yes.

E : So Ferdy only mockups one session of the application and if I'm not mistaken that's part of the real prayer, right, if there is something else, there is a compass, and what else was that. Then, just want to close it right away?

F : means that the voting result will be the second design, right?

E : yes means the voting results. We use the second design? That's all from our group. Once again, thank you for my friends who have been there for taking the time to discuss this design with us and for giving us suggestions too, voices too. I represent group F resigned,  
Wassalamualaikum warahmatullahi wabarakatuh

All : wa'alaikumussalam Warahmatullahi Wabarakatuh.
